

AI Engineer - Data and AI

Chennai, Bangalore, Hyderabad

JOB DESCRIPTION

AI Engineer – Data and AI

Location: Chennai, Bengaluru and Hyderabad

Who we are?

Tiger Analytics is a global leader in AI and analytics, helping Fortune 1000 companies solve their toughest challenges. We offer full-stack AI and analytics services & solutions to empower businesses to achieve real outcomes and value at scale. We are on a mission to push the boundaries of what AI and analytics can do to help enterprises navigate uncertainty and move forward decisively. Our purpose is to provide certainty to shape a better tomorrow.

Our team of 4000+ technologists and consultants are based in the US, Canada, the UK, India, Singapore and Australia, working closely with clients across CPG, Retail, Insurance, BFS, Manufacturing, Life Sciences, and Healthcare. Many of our team leaders rank in Top 10 and 40 Under 40 lists, exemplifying our dedication to innovation and excellence.

We are a Great Place to Work-Certified™ (2022-24), recognized by analyst firms such as Forrester, Gartner, HFS, Everest, ISG and others. We have been ranked among the ‘Best’ and ‘Fastest Growing’ analytics firms lists by Inc., Financial Times, Economic Times and Analytics India Magazine.

Curious about the role? What your typical day would look like?

We’re looking for a talented and driven AI Engineer to join a meaningful internal strategic initiative and also to contribute to solving complex AI/ML problems for our clients. You'll be working closely with senior leadership, including one of our founders, to help build an innovative enterprise platform for the organization. This platform will act as a digital twin of our existing systems—an intelligent bot/ Platform that provides real-time insights on what needs to be done and how to do it.

If you're passionate about Generative AI, LLMs, and cutting-edge technology, and you enjoy building high-impact solutions, we’d love to hear from you! As an AI Engineer on the Data and AI team, you will:

- Collaborate with leadership to understand the vision, scope, and requirements for the enterprise platform.
- Help design and develop a smart, AI-driven platform that guides and optimizes projects with real-time intelligence.
- Work hands-on with the latest technologies like LLMs (Large Language Models) and Generative AI to build transformative tools.
- Assist in the integration of the platform with existing organizational systems, ensuring seamless functionality.
- Contribute to building scalable, reliable, and high-performance software solutions.

Participate in peer reviews and champion code quality within the team.

EXPERTISE AND QUALIFICATIONS

What do we expect?

- 2-6 years of experience in MLE/MLOps/AI Engg.
- Experience working in LLMs, Generative AI, or similar AI technologies.
- Proficient in backend development using Python (Django/Flask) or similar technologies.
- Good understanding of APIs and microservices architecture.
- Ability to collaborate with cross-functional teams and work in a fast-paced environment.
- Passion for learning and applying new technologies to solve complex problems.

You are important to us, let’s stay connected!

Every individual comes with a different set of skills and qualities so even if you don’t tick all the boxes for the role today, we urge you to apply as there might be a suitable/unique role for you tomorrow. We are an equal opportunity employer. Our diverse and inclusive culture and values guide us to listen, trust, respect, and encourage people to grow the way they desire.

Note: The designation will be commensurate with expertise and experience. Compensation packages are among the best in the industry.

Additional Benefits: Health insurance (self & family), virtual wellness platform, and knowledge communities.
